Description

Acceptance Criteria:

- The user should be able to navigate to the "Create Account" page from the homepage.
- The "Create Account" page should have fields for email and password.
- The email field should accept a valid email address format.
- The password field should enforce a minimum of 8 characters, including at least one uppercase letter, one lowercase letter, one number, and one special character.
- The user should see a "Create Account" button that is enabled only when both fields are filled correctly.
- On clicking the "Create Account" button, the user should receive a confirmation email.
- The user should see a confirmation message indicating that an email has been sent for verification.

[TG-4] [As a user, I want to verify my account using my email so that I can confirm my identity.](#) Created: 30/May/24 Updated: 30/May/24

Description

Browse Players' Leaderboard

Story Points: 3

Acceptance Criteria:

- The user should be able to navigate to the "Leaderboard" page from their dashboard.
- The "Leaderboard" page should display a list of top players.
- Each player entry should include the player's name, avatar, and score.
- The leaderboard should be sortable by different criteria (e.g., score, rank, name).
- The user should be able to see their own position and score highlighted in the leaderboard.
- The leaderboard should update in real-time or periodically to reflect the latest scores.

[TG-36] As a user, I want to check the leaderboard for each league so that I can compare my progress with others. Created: 30/May/24 Updated: 30/May/24

Description

Acceptance Criteria:

- The user should be able to navigate to the "Map" screen from the homepage or dashboard.
- The map should display markers with different icons for each type of sight (e.g., museums, parks, historical sites).
- Each icon should be visually distinct and representative of the sight type.
- The user should see a legend or key on the map explaining the meaning of each icon.
- The icons should be clear and easily distinguishable at different zoom levels.
- The user should be able to hover over or click on an icon to see the name and type of the sight.

[TG-44] As a user, I want to see detailed information about a sight after clicking on its icon on the map so that I can learn more about it. Created:

Rank:	0 i0008v:
Story point estimate:	3

Description

Acceptance Criteria:

- The user should be able to click on any sight icon on the "Map" screen.
- On clicking an icon, a pop-up or sidebar should appear with detailed information about the sight.
- The detailed information should include the sight's name, image, description, location, opening hours, and contact information.
- The pop-up or sidebar should also include a link or button to navigate to the "Sight Information" page for more details.
- The user should be able to close the pop-up or sidebar easily to return to the map view.
- The detailed information should load quickly and be user-friendly.
