#### Acceptance Criteria:

- The user should see a filter option for "Popularity" on the "Main Sights" screen.
- The user should be able to select the popularity filter to sort sights by their popularity.
- The list of sights should update to display the most popular sights first.
- The user should see a visual indicator of the popularity (e.g., number of visits, ratings).
- The user should be able to clear the popularity filter to return to the default sorting.

### Description

#### Acceptance Criteria:

- The user should be able to navigate to the "Map" screen from the homepage or dashboard.
- The map should display markers with different icons for each type of sight (e.g., museums, parks, historical sites).
- Each icon should be visually distinct and representative of the sight type.
- The user should see a legend or key on the map explaining the meaning of each icon.
- The icons should be clear and easily distinguishable at different zoom levels.
- The user should be able to hover over or click on an icon to see the name and type of the sight.

### Interactive map (TG-43)

🔗[TG-42] As a user, I want to see detailed information about a sight after clicking on its icon on the map so that I can learn more about it. Created:

### Description

#### Acceptance Criteria:

- The user should be able to click on any sight icon on the "Map" screen.
- On clicking an icon, a pop-up or sidebar should appear with detailed information about the sight.
- The detailed information should include the sight's name, image, description, location, opening hours, and contact information.
- The pop-up or sidebar should also include a link or button to navigate to the "Sight Information" page for more details.
- The user should be able to close the pop-up or sidebar easily to return to the map view.
- The detailed information should load quickly and be user-friendly.
